Q: H2 DB : Merging connections of a single node fails In H2 database, if I try to merge connections of the same node, the merge fails with the error: Cannot merge connections from the same node Is there a way around this? I need multiple connections with different user IDs for various tests. I am running the tests via JUnit through Jenkins. I am not using DbUnit. I am aware that there is no concept of "schema" in H2, so I am not referring to schema merging. The purpose of this question is to understand whether it is possible to create multiple connections in H2 for a single node. A: I'm not entirely sure what your problem is. I'm running H2 1.3.182 and I can't reproduce the issue you're reporting. I'm also using Jenkins to run my JUnit tests against H2. When you use JDBC for your tests in H2, you need to use the "default" schema. The schema is maintained in the com.h2database.server.h2.schema.DefaultSchemaRegistry class. When you create your Database object in the test, use this schema: sql.add("DROP SCHEMA IF EXISTS myschema;"); sql.add("CREATE SCHEMA myschema AUTHORIZATION myuser;"); The "myschema" is just a (safe) naming of the schema in the DefaultSchemaRegistry instance. The "mysuser"
