
Aero Glass For Win8.1

[Download](#)

December 19, 2019 - Aero Glass is a free program that, you guessed it, restores the popular "Aero Glass effect" in Windows 8 and Windows 10. The program uses .NET API to change the settings screen (Display tab) in Windows 8 and Windows 10 so that the settings window looks like Aero Glass. Aero Glass is a "glassy" interface style that uses a lot of glass for a transparent effect. Some older applications such as Aero Glass use this style in their controls, and other applications use this style to achieve this effect.
