(video: 2:45 min.) Can you see any changes in the new version of AutoCAD? I know some of you have been anxiously awaiting news on AutoCAD 2023. That’s not far away, we’re almost there. You should have received the first of a series of emails a few weeks ago with information about what’s in store. In that first email, we explained that we were committed to delivering AutoCAD 2023 in the second half of 2019 and will continue that promise. That’s going to take some time because there are many things to do and we need to make sure we get everything right. But it’s going to happen. What is new in AutoCAD 2023 Here’s a short list of what’s new in AutoCAD 2023. I’ve put a video below that shows more details, and links to the new features and enhancements. Everything that you have already learned in AutoCAD has stayed the same. We’ve improved AutoCAD’s efficiency and usefulness. AutoCAD’s features are still accessible and easy to use, just with a few new improvements. No more outdated components As we move forward with AutoCAD 2023 we will be removing components that haven’t been updated for a long time. For example, I’ve taken the opportunity to move the Boundary Shape component into AutoCAD Designer. If you’re looking for great results when creating and editing complex boundary and area shapes, you should take a look at this new component. The next component we are looking to remove is the Grass, Tree, Curved, and Freeform Shape components. These components are no longer used by default, but
