the above-mentioned methods

for installing the driver

them (except Method 5) didn't

work. In all cases, when I am

trying to list the COM port using the above command in the cmd prompt, I get the following error messages:

COM32.PROP Files When  
installing the driver of this  
company, you need to include a  
file called COM32.PROP to the  
INF file. In case that the driver  
is not included in this file,  
Windows will not find the driver  
and you will not be able to

---

install it. So it is a vital part of driver installation process. The files are available here 2)
