The time we end up spending in front of the computer is constantly increasing considering both individuals and other people, in general, as a collective entity. In a world where all systems and processes are automated, to be able to handle technology well is an absolute requirement. Whether you spend plenty of hours browsing the Internet and online researching for work or in your personal interest, you need to protect your eyes. Dark Theme for Google Cracked Accounts is a Firefox add-on that gets installed in seconds. The plug-in will help you avoid eyestrain. To enable/disable it, you just have to click the icon that gets added to your toolbar. This extension was built based on the user-style themes available in the Stylish web service (and extension). However, compared to Stylish, Dark Theme for Google Download With Full Crack is faster, simpler, and a lot less resource-draining. The plug-in's capabilities and customization options Dark Theme for Google is surprisingly-well optimized, especially for such a small browser extension. Primarily, it will darken the Google search entire's user interface and all other SSL-encrypted Google search pages; for example Google Images, Google Translate, Google Videos, Google News, etc. Optionally, you can set the add-on to perform the interface switch between dark and the default automatically. From the extension's options, you can configure it to turn on the dark theme between certain hours of the day. Also, you can change the font colors, the links' color/header color/color for already-visited URLs, and the selection's and background's chromatic shades. For even more changes, you can use custom CSS to modify the interface to fit your needs. Conclusion To summarize, Dark Theme for Google is probably the kind of browser enhancer you can't let pass you by. For your comfort and to prevent the fatigue of your eyes, the add-on will deliver what it promises to. If you are searching for a qualitative extension to ease your eyes and stress due to prolonged screen exposure, Dark Theme for Google will certainly help you. Dark Theme for Google Review - Features Provides a dark theme for the Internet Explorer, Firefox, Opera and Chrome browsers and other SSL-encrypted pages. To do that, you can simply install this add-on, which will apply a darker theme to the Google's user interface. This extension was built on the Stylish web service (and extension), and its data is immediately saved in the user
