As I was doing so, I was told that this box could hold up to ten identical pieces of paper. In that time, he had to have told me that I just printed my picture, that I copied it, and now I can give it to someone else. How? To tell you the truth, I never saw it done, but it's pretty simple. I did not notice that the copy started from the center of the paper. The process is very similar to that of printing, but instead of using paper, you use a PDF file with the exact same size
