Automated modeling AutoCAD can import XML-based files such as STEP and IGES. The STEP and IGES files allow the creation of 3D models. The subtypes of modeling tools include: 2D sketching 3D modelling and drafting 3D modeling and designing 3D rendering 3D printing CAD data exchange Interoperability with CAD data Net-based interoperability Data import, export and conversion Add-on modeling tools Vectorization The user interface for 3D modeling and design tools is similar to other CAD products and uses the same tools, such as dimensions, text, and constraints. Modelling and drafting AutoCAD supports a variety of modeling tools that range from simple one-click actions to complex multistep processes. The modeling tools in AutoCAD are similar to those of other CAD products. There are thousands of modeling tools that are available through the AutoCAD Add-Ons. A list of these tools is available at The AutoCAD Add-On Tools page. The modeling tools include: 2D drawing 3D modelling and drafting Surface modelling Drafting tools Sculpting and extrusion Vectorization The user interface for the modeling tools is also similar to those of other CAD products. Surface modelling AutoCAD supports surface modeling. When the surface is created, its topology is presented with a cross-section. The user can then manipulate the faces of the model. Drafting tools The drafting tools include: Drafting guides Grids Section views 3D printing Editing Feature control Drafting overlay Overlay and underlay Edit Geometry Selection tools Move and copy Object snap Object snapping Delete Intersect Locate Measure Offset Optimize Shape styles Snap to Geometry Track Trim Undo Viewing Visibility Z-axis adjustment Z-axis snaps 3D wireframe Object snaps Navigate Object snap 3D space Align to point Altitude Automated surface generation Auto-fold Auto-zoom ca3bfb1094

What's New in the AutoCAD?

The new Markup Assistant, which is a palette from the DesignCenter, enables you to quickly sketch out a design or automatically add a basic outline to a drawing or drawing template, and then export the outline as a PDF, EPS, or DWG. (video: 2:25 min.) This functionality is also available in the new Markup Import tool. The Markup Assistant also enables you to import your most frequently used marks and patterns and apply them automatically to a drawing or template. It also enables you to create, edit, and apply your own marks and patterns to your drawings. (video: 2:50 min.) Add Light and Shadow Effects to Drawings: Easily add light and shadow effects to your drawings. You can apply shadows to any of the default lighting options, such as the sun or a light, and then modify them from the existing lighting options. Additionally, you can apply shadows to any of the lighting choices you choose, such as default lighting options or your own lighting sources. (video: 3:18 min.) Add Live Text and Background Images to Drawings: Text and background images can be easily added to your drawings. This means you can create a perfect table of contents, set your document to the correct scale, and then place text and background images in the drawing, and they will maintain their appearance throughout the document. You can also easily define the text position, size, and font, and quickly move objects into the scene. The new text options enable you to easily apply different fonts and text styles, and then resize the text to any size you want. (video: 3:40 min.) Insert Text Boxes with Text Tool: Using the Text tool, you can place text boxes at any point and size you want. Text boxes can be used to place text in any position in your drawing, and text can be placed at any scale within a text box. (video: 4:32 min.) Automatic DPI Settings for New Documents: Any document, including a drawing or template, can now be set to the exact DPI you want automatically when it's created. Additionally, it can be set to retain the DPI setting you specified for any previous document you save. In addition, you can set a DPI for your drawing or template and then automatically modify the DPI setting in subsequent drawings. Or, you can set a D
