Here is the query I'm trying to use, but it returns only one record, i.e.: "SELECT ID FROM table1 ORDER BY data_id ASC" The table is sorted by the dat_id, the ID's are the same. Any help would be appreciated. Thanks in advance. A: MySQL doesn't support this directly (as of 5.0.44). You can do it with a subquery, but it isn't very pretty: SELECT

What's New in the AutoCAD?

Add lines to existing shapes and in the end undo when shapes are closed or closed on its own. (video: 1:43 min.) New support for layer boundaries and tag order in the worksheet and Db file: Mark up layer boundaries with dotted lines to more accurately show where you want shapes to be independent of each other. The new layer boundary lines are based on your existing, imported layer map. (video: 1:47 min.) Automatically move tag order items to the top of the sheet when you create and import tags. (video: 1:10 min.) Work in conjunction with Excel Map reading for Excel users: View your AutoCAD database as a relational table, directly in Excel (like Access or other database tools), and without database-specific skills. (video: 2:53 min.) Open Excel from within AutoCAD using the new "Excel" command. Map data and run queries using common Excel syntax and features. (video: 1:48 min.) Importing: AutoCAD now supports importing from native formats. And you can now import from multiple native formats in the same model. (video: 1:23 min.)
