PUNE: A man, who attempted to commit suicide near Pune railway station by consuming an overdose of benzodiazepine, died of its side effects even as hospital said that a case of murder will be registered against his family members if they fail to produce his body by July 1. A constable, who was working at the station, found the 35-year-old man, identified as P S Patil, lying unconscious near the public toilets on Tuesday morning and informed the Railway Protection Force (RPF) at the station. He was rushed to a nearby hospital where doctors said his condition was serious. "The constable saw blood stained on the walls inside the toilet which suggested that Patil had put up a fight against his attempted suicide and tried to save himself. The constable, who is a family member of Patil, mentioned the matter to the RPF who after an investigation and in view of the suspect's condition, took charge of the case and lodged an FIR against the other family members who were keeping a watch at the station," said additional railway police official Vighnesh Dogra. Patil had consumed one tablet of Benzodiazepine, a drug for anxiety and insomnia, some two hours before he set himself on fire in the toilet. He was rushed to the nearby EMRI Hospital where doctors said he was in a critical condition. He eventually died on Thursday. Doctors said that the man had attempted to commit suicide by consuming Benzodiazepine. "Based on the FIR lodged by RPF, the police has registered a case under sections 302, 201, 345B and section 7 of the Indian Penal Code (IPC) against the man's family members, who had refused to inform the police about his suicide attempt," said another railway police official Pankaj Gaud. The constable said Patil's family members refused to inform him about the suicide attempt. "We are waiting for his body and after we receive it, we will charge them with the crime of murder. We will also probe the role played by Patil's relatives in this case. We will also press for the withdrawal of Patil's death certificate and we will investigate whether he was pushed into committing suicide or was he lying unconscious in the toilet before he consumed the drug," said the constable. Meanwhile, the EMRI Hospital's staff said that the family members of the man kept

Here's How Smashing Magazine's History Might Impact Social Media Smashing Magazine, an important and influential press outlet for designers and developers, has been publishing since 2003. Recently, the company hired Jonathan Eloff, a well-known social media practitioner, to help raise awareness and participation in their online community. While some of Smashing's younger followers might not know about its bigger social media efforts, their history is important in understanding how a digital-focused press company runs a social network. The company's origins Before founder Alex Nowakowski founded Smashing in 2003, he was a freelancer specializing in Ruby on Rails. His experience growing the ever-popular Ruby on Rails framework in the late '90s caused him to form a relationship with a number of prominent developers, including S. Becket, Tom Dale, and Anders Hejlsberg. As the mastermind behind Ruby on Rails, Nowakowski became a well-known figure in the Ruby community, which provided him access to a large pool of aspiring developers. With his large network of contacts, he started to write a series of tutorials for the Ruby on Rails framework. While Nowakowski's presentations were geared towards intermediate to advanced developers, he aimed to simplify the industry for beginners. This provided a platform for beginner developers to learn a variety of Rails development skills. The first issue of Smashing Magazine In 2003, Nowakowski began to produce a monthly e-zine with the goal of bringing more advanced web technologies to beginners. Since then, the company has grown to include a visual identity, a devoted community, a large network of tech writers, and a support staff. The company's offices are located in Philadelphia, and its staff and contributors work remotely. The first issue of Smashing Magazine featured articles on responsive design, Ruby on Rails, and the Semantic Web. Its sister magazine, Smashing Magazine for Designers, is a publication with articles about web design, UX, and usability. Smashing's magazine has grown to become the most well-known digital publication in the industry. Smashing Magazine's Social Media Strategy Just after gaining its first Internet following, Smashing Magazine began to slowly begin to expand its social media presence. Smashing Magazine's logo In order to encourage members to communicate with each other and build a strong online community, the company launched an active Twitter account in early 2007.
