King's Heroes is a turn-based game in which characters from the Tolkien epic take on the shape of a tactical game. Your choices in a move determine the outcome of an encounter and eventually the fate of the game. Features: • A huge cast of 26 distinct characters • dozens of abilities, skills, magic spells and unique equipment • scores of state-specific features: wizards in school, princesses, warriors or knights • three different game modes in which to experience the world of Middle-Earth • tactical combat: battle real or random opponents with realistic numerical values and cooldowns • magic: casters cast spells and debuff enemies; heroes attack with one or two attacks with a magical bonus • unique puzzles: logic, strategy and puzzles are at play • an extensive statistics system: learn the most important elements of every play • music and a fully animated graphic interface You can find other resources on the Steam Workshop: Search for "Steam Workshop" in the share file "About This Game" in the properties of the game. LessQ: Split string to lowercase, and if it doesn't exist get it, and if it does not exist, print what is there I'm trying to write a program that takes in a string, takes lowercase all the characters in the string, and then if it is not there, print what is there, and if it is there, print what is there. The problem I'm facing is getting lowercase all of the string. I've tried a few methods but I can't figure out what's going wrong. Maybe someone can help me out. Here is my code: 

```
user_str = input("Enter a word to convert to lowercase: ")
def f(user_str):
    for letter in user_str:
        user_str = user_str.lower()
    return user_str
def l(user_str):
    for letter in user_str:
        user_str = user_str.capitalize()
    return user_str
def print_check(user_str):
    if user_str is not None:
        print(user_str)

### **What's new in Big Byz Wars:**

**Tuesday, April 21, 2011 Today I am so excited about the new colors launched on the [www.muskfragrance.com](http://www.muskfragrance.com) website! I know many of you have been waiting for this collection and I am pleased to have a bottle of each for you to try!! This collection has been part of the Memories of Musk (and Fragrance IV) Collection that will be rolled out in a few months with a new fragrance number. I am jealous that all of you will have the opportunity to purchase this designer fragrance in your store!! I know I am excited!! I'm a sucker for the brighter colors and love the colors in this collection!! Based on the name of the collection, you may be wondering if the colors in this collection are inspired by the sentiments of the beginning of the year. Although I have a feeling that the designers saw color and fragrance when they created this collection and were inspired to create something new and memorable - yes, that inspired me to try this fragrance!! So let's start: Chrysanthemums in Nude and Caramel (slightly cold) The Chrysanthemum leaves are from the Snapdragon flower and are so sweet!! I just love the way the designers turned them into a fragrance. I love the scent of both the Snapdragon and Chrysanthemum, so I smell them when I use this new fragrance as I already am accustomed to the scent. First there's the sweet smell of Chrysanthemum leaves. This is followed by a slightly cold note of white peony. I love the temperature change in this middle note - the temperature shift enhances the unique character of this new fragrance! I think that my favorite is the Snapdragon because it is very unusual and reminds me of Japanese**

**Chrysanthemums. This scent is perfect for work and weekend getaways, or just by yourself. I am sure that it will be welcomed in all the windowsill and on the windows of your loved ones!! The scent lingers in a very fresh and light manner. Eccentric or musky in the Chrysanthemum perfume released by Tiffany. This perfume has incredible craftsmanship and packaging! The design and packaging is more like a work of art than being a decorative bottle. The design is incredibly intricate and beautiful! Although this collection is for sure**
