

An ARPG action game developed by CyberConnect2, the developers of the flagship games in the Yu-Gi-Oh! series. The game takes place in a fantasy world based on the Lands Between, a space between the lands of life and death. A group of young people are traveling through this dangerous world when suddenly they come across an ominous island. On this island, the Elden Lords' nation has been established, and the young people are drawn into the conflict between the Elden Lords and the forces of Orra, the Chaos god. From there, the story will unfold. Journey to the top of the Elden Lords' nation and find your destiny. Name: E Developer: 12ing Publisher: 12ing Platform: iOS/Android Price: Free Release Date: 2016/06/16

the Unreal Engine, and the pre-rendered movies are done by a Japanese studio called Spicylink. So it's a PC version that uses the Unreal Engine 4. It's more polished than Lupin III: The Game of Death but it's not a port, so maybe you can play it from your system.
