That's totally cool. Hey, I'm just a guy who knows a little something about a lot of things, so if I write about it, it's probably because I think you should know about it too. I'm happy to try and help you find good things to read and watch, so let me know. (If you buy me a coffee too, that would be awesome!)Development of an oral vaccine against hantavirus pathogenesis using a recombinant protein from the nucleocapsid of Sin Nombre virus. Hantaviruses are a group of highly pathogenic viruses that cause hemorrhagic fever with renal syndrome and hantavirus cardiopulmonary syndrome. Hantavirus pathogenesis is associated with higher levels of neutralizing antibodies than pathogenesis, but the role of antibodies in pathogenesis is not well characterized. Here we produced and characterized a recombinant protein, mr371, corresponding to a surface glycoprotein of Sin Nombre virus (SNV), which is able to induce antibodies that can neutralize SNV in mice. The vaccine was able to confer cross-protection against the pathogenic virus and to attenuate the disease when administered to infected mice. This approach could be useful in developing a universal hantavirus vaccine that could provide effective protection against all pathogenic hantaviruses.While it's not as mind-blowing a feat as some of the Super Mario Maker stuff Nintendo's been putting out lately, the following creation will surely give you a good chuckle. It's a level that's all about a depressing black-and-white rendition of the classic Teenage Mutant Ninja Turtles arcade game. You can play it yourself here, courtesy of Progfest creator Leonidas Kriss. We saw the original black-and-white Teenage Mutant Ninja Turtles arcade game earlier today, but not even the Wii version was as depressing as Kriss's recreation. The effective lack of color is what really sets the game apart from its usual-colored brethren, but it might not be for everyone. Seriously, let's
