
How can I solve it? If it is possible, please help me by giving me the code or just a hint, Thanks in advance. A: You can try removing the extra whitespace from your second if statement, and then remove the extra if statement altogether.

```
def average_times(s1, s2): if s1.isdigit() and s2.isdigit(): return float(s1) + float(s2) / 2 if s1.isdigit() or
```

`s2.isdigit():` return
`float(s1) + float(s2) / 2`
`answer = average_time`
`s(num_one, num_two)`
`print (answer)` "It's the
ultimate honor," Parillo
said. "I think it's really
cool because it's in
Switzerland, it's in a
castle, it's a pretty
amazing venue, so it's
kind of the best of what
I've seen and I think
I've been really lucky in
the mix I've been in. I
got to see it in
Amsterdam, I saw it in

Croatia last year, I saw it in Italy this year, it's pretty cool to see it in Switzerland."Q: C# - A continuous loop that will delete every item on a list I have a list that I have designed to house the contents of an IDD card. The list reads something like this: 1) Name 2) Street Address 3) City 4) State 5) ZIP Code 6) ID Number 7) Expiration Date 8) Social Security Number And so on... I

want to make a program where if the user types an ID number, and hits enter, the program will delete the correct item on the list. Here is what I have so far: `System.IO.StreamReader keyreader = new StreamReader("F:\ID card.txt"); string textline = keyreader.ReadLine(); textline = textline.Replace("\r", "").Replace(" ", "");`

while (!text 6d1f23a050
