EML To MSG Converter Software is a reliable software, dedicated to copying the data from EML files to a format that is also supported by other email clients: MSG. The software can easily convert the message files saved with Microsoft Outlook into a type of document that can be opened with a series of programs. Effective converter **EML To MSG Converter**

Software allows you to easily transfer the data to a different type of file, that you can use with several email clients.

MSG files are more versatile than the EML format, which can only be handled with Microsoft Outlook. Thus, the software offers you a solution to reading your messages with a series of other email clients. The application itself is easy to use and allows you to quickly extract the data from EML documents, create new MSG

items, then copy the information to the output files. Moreover, EML To MSG Converter Software can easily manipulate a multitude of files, at the same time, then save the output to the indicated location. Quick process and progress indicator The software is specialized in converting EML files to MSG and does not support other format as input, nor as output. It allows you to load several files, from different folders, or

just load the entire directory, so it can select the supported files. The display area contains the files that are to be converted, while a designated field indicates the output folder. The conversion process is completed within a few seconds, its evolution being marked on the progress bar. The software maintains the filenames from the input documents, however, you may easily save them in the source directory, without overwriting

the initial files. Reliable data transfer software While EML files require Microsoft Outlook in order to be viewed, MSG files can also be opened with other software. Therefore, converting EML files to MSG can be useful for users who do not own the email client or for those who wish to view the message without replying to it.
