

Climsy is a simple-to-use piece of software capable of quickly uploading copied images to Climsy.com, ImageShack.us and Dropbox. It can also save them as JPEG or PNG files. The tool features a couple of intuitive options that can be quickly figured out, even by those less experienced with such tools. Easy setup and systray integration After installation, the utility gets integrated into the Windows startup sequence, so it automatically runs every time you turn on the computer. However, this option can be later disabled from the settings panel. When it comes to the interface, Climsy creates an icon in the systray at startup and immediately becomes active, reacting every time you record graphical elements to the Clipboard. It's not affected by files, URLs, text, or other types of clips. Upload or save captured images The tool pops up from the taskbar notifications area and reveals the image size and thumbnail, giving you the possibility to perform the default sharing option. This option can be controlled from the settings panel, where it's also possible to pick the image type and adjust the JPG compression level. Additionally, you can prevent the tool from auto copying image links, ask it to autoupload photos to the storage server, hide notifications on Clipboard events, change the UI language, as well as apply a proxy configuration to establish an Internet connection. Evaluation and conclusion The tool worked smoothly in our tests and remained stable in its runtime. It didn't hang, crash or indicate errors. As we expected, system resources were minimally used, so it didn't affect our typical desktop activity because of high performance. All in all, Climsy comes packed with clean and intuitive options to help you upload images to various file hosting websites or save them locally. It's geared toward all types of users.

Q: How do I make the footer stay at the bottom of the page while the page scrolls horizontally? I have a responsive jquery carousel, which works just fine. However, the last item of the carousel does not stay at the bottom of the page. Instead, it shifts up/down with the scroll action. Here is the JQuery function that is causing the problem: `$(window).scroll(function(){ if(($(window).scrollTop() + $(window).height()) > ($(window).height() - 570)){`

Keymacro for Windows Keymacro is a powerful Windows keymacro program, which is very easy to use and can be installed on several Windows operating systems such as Windows 98, ME, 2000, XP, Vista and Windows 7 without any

Link Download: Download Now Installation is simple and it only takes a few minutes to install and configure. With the help of this software you can easily use many of the most well-known file hosting sites. Sheikh Jeru Saifullah Gaofianvi

Sheikh Jeru Saifullah Gaofianvi (1720–1775) was a prominent religious and political figure in the Sultanate of Serenah. Background Jeru was born in 1720 in the Gaofianvi village of the Serenah kingdom. Sheikh Jeru's father was Sheikh Zayd, and his mother was the second wife of Sheikh Hasan ibn Ali. Political career He became involved in politics after the death of Sheikh Ahmad ibn Yahya al-Makhzumi in 1744. Before Sheikh Ahmad's death he had appointed Sheikh Jeru as qadi (chief judge) of Serenah. Sheikh Jeru was highly respected in his domain and encouraged the people of the village to develop their own literacy by teaching them the Quran and the most important Islamic rules. Death Sheikh Jeru

System Requirements:

Core2 Quad, 2G Ram, GeForce 9800 GT+ / ATI Radeon HD 2600 XT, 1 Gb VRAM, 16 Gb HDD, etc. Beware: not all of these modes will be available on all games. For example, the default map mode is 1280x1024 while the textured map mode is 1280x1024 (unscaled). System Requirements : Pre-requisites Driver support
Operating system : Windows Vista/XP, Windows 7 Other Requirements Standard, advanced, and
