Share for Review is the first major update to Adobe Photoshop since Adobe launched its Creative Cloud membership program in 2015. When using Share for Review, any changes made to a document are synchronized to co-workers' desktops and shared online. Alternatively, if your colleagues are not online or choose not to collaborate, the edits you make to Photoshop will be stored locally for you to access and modify offline. Share for Review is available in the Photoshop Creative Cloud desktop app (in beta) and Photoshop CC software for Windows, Mac and Apple iOS. "We're committed to making Photoshop as approachable as possible so more people can use it and turn their ideas into reality. Share for Review is our way of making it easier for you to make edits in Photoshop," said Adobe Photoshop expert Lee Brimelow. Adopting the Share for Review feature is as simple as selecting the "Share for Review" command from the Review menu in Photoshop. When you're ready to share, click the Share button. Your colleagues will then receive an invitation to confirm the changes you made, select the new state of the document and review them. In addition to sharing changes alone, you're also able to quickly share projects through the File ⌘ U menu. When you're done sharing, Click Discard and the changes to the document will be discarded. Share for Review also makes it possible for users to edit HTML files hosted on SharePoint without having to install additional software. Users can create HTML 5 files directly from Photoshop and, if Share for Review is installed on the consumer version of the desktop application, they'll be automatically sent to SharePoint where they can be viewed with the built-in Web portal.
