Users can also use Adobe Sensei AI to find similarities among large sets of images without the confirmation of other people. These are changes to the online viewing and editing features of the product. "Publish for Review" is a new mechanism that will allow users to share a "clean" review copy of a shared file, with comments and reviews captured. Admins will have the ability to choose which reviews to make public or keep private. Editing is done through a downloadable version of Adobe Photoshop, and comments are not saved. Adobe made the above changes available with the "Share for review" feature that offers a faster and collaborative way to edit digital images.
